

STREAMLINE YOUR CIP PROCESS

“The adoption of Plan4Learning was like turning on a light switch for our CIP process - it’s the best platform I work on.”

Courtney Hart, Ph.D., Federal Programs Director

OVERVIEW

Lewisville ISD, a district with 72 schools and over 54,500 students was struggling with antiquated software for their campus improvement planning process. The user interface was slow and outdated. The creators of this old software did not understand Lewisville ISD’s needs, nor were they keeping up with changes in state and federal regulations.

SOLUTION

Lewisville ISD partnered with us to participate in a pilot of Plan4Learning. We trained and onboarded a subset of the district, starting with 28 Title I schools. After piloting Plan4Learning, all 28 principals fully supported and approved a full roll-out of the improvement planning software. We helped Lewisville ISD train and onboard their additional 44 schools so that the entire district was seamlessly operating on a new system. The old software was completely replaced by Plan4Learning, and the district-wide transition to this new platform was smooth and organized.

RESULTS

Today, Lewisville ISD easily monitors every campus improvement plan across the district. The district now operates efficiently and has full certainty that they are always in compliance with state and federal regulations.

PEACE OF MIND

Easily monitor all campus progress through a simple dashboard interface and home screen quick view.

ALWAYS UP-TO-DATE

We are experts in education, who stay on top of state and federal regulations and regularly update our software accordingly.

EASE OF USE

Plan4Learning is fast and easy to use. The tool allows districts to align and communicate with every campus.

ONGOING SUPPORT

We provide continuous support and training to ensure that every campus is successfully transitioned and onboarded.
